

## THERMOSTATS

Setting a consistent schedule using a programmable thermostat can save you money every month and prevent unnecessary wear and tear on your equipment.

Everything is now digital and the option to set by program, your heating and cooling is extremely convenient. Most allow for setting both heating and cooling at the same time which is highly valued in the New Mexico climate where temperatures change drastically throughout the day.

Thermostats that are digital hold better accuracy resulting in higher comfort across your home.

Convenience is another benefit by allowing you to connect to your systems via WiFi and mobile device apps. Want your home to be ready for you upon arrival after a hard days work? Forgot to adjust it before going on your trip? Have a surprise guest and want it ready for their arrival? Use your app to remote in and make your desired updates.

Contact us to have a Service Technician assist you in acquiring your best option to suit your needs.
